KHAYAL scent cart · build drawing

FOR THE CARPENTER · ALL SIZES IN CM · BREAKS DOWN FLAT FOR A CAR BOOT

FRONT VIEW (WHAT GUESTS SEE)

SIDE VIEW

BREAKS DOWN INTO 5 FLAT PARTS

1. Base box with 2 shelves inside
2. Counter top (lifts off)
3. 2 posts (bolt into the back corners)
4. Back panel with 2 bottle shelves
5. Header sign

MATERIALS (CHEAPEST THAT STILL LOOKS PREMIUM)

- **Body:** 18 mm plywood or MDF, painted matte aubergine / black
- **Counter top:** 18 mm ply with wood-grain sheet (Formica / laminate) or walnut stain
- **Posts:** 2″ × 2″ pine (or square steel tube)
- **Branding:** printed vinyl sticker on the front panel and sign, not painted letters (cheap, replaceable for each event)
- **Wheels:** 4 lockable casters, 3–4″. **For the beach** the cart is carried, so wheels are optional
- **Light:** warm-white USB LED strip under the sign + power bank
- **Back:** curtain or open, so you can reach stock
- **Tester riser:** small 2-step ply block, wood-grain

Ask 2–3 carpenters for a quote on this drawing. Any local carpenter or furniture-market workshop can build it. Ask the printer separately for the vinyl, and reuse the cart for every event by changing only the vinyl.

Cheaper still: skip the cart. Use a folding table + aubergine fitted tablecloth with a gold KHAYAL print + the welcome board on an easel + the tester riser. Much cheaper, and it fits in any car.
